

WORKING STUDENT AND/OR BACHELOR/MASTER THESIS – SOFTWARE ENGINEERING (ALL GENDERS)

HYBRID – KARLSRUHE – STUTTGART

You already have some coding experience that you want to put into practice? Be part of our software engineering team during your studies. Gripping projects awaiting you and you can gain valuable practical insights into the world of software engineering. At arconsis, people come first. If we think you fit in, we will find the right tasks for you in our teams. No matter what technology you already have experience with - iOS, Android, Web, Backend. Are you almost finished with your studies, and you are ready to write your Bachelor or Master thesis? No problem, we are happy to support you with our experience.

WHAT YOU CAN EXPECT

- Support our team in planning and executing full software development life cycles
- Learn about mobile application development, adapting to technological innovations
- Learn about ensuring seamless integration of the software into the enterprise IT
- Challenging tasks in a dynamic cross-functional team with flat hierarchies
- Very good development and training opportunities
- An open communication culture and a pleasant working atmosphere
- For us working time is lifetime and should be filled with purpose and joy
- You have the chance to develop with us and secure your ticket to start your professional career at arconsis

WHO WOULD FIT IN WELL

- Computer Science student or comparable field of study
- Passion for technologies, methods and new trends
- First practical knowledge in software development – no matter in which technology: Android, iOS, Backend or Web
- Good German and English skills
- Interest in the area of agile methods and process models (e.g. Scrum)
- Basic UI/UX knowledge
- An independent, solution-oriented and reliable way of working

WHAT WE STAND FOR

- At arconsis you are surrounded by software engineer enthusiasts and gripping projects await you
- We love to share knowledge and support each other
- Working together as a team to achieve a common goal and know how to get things done
- Open communication and a pleasant working atmosphere with cool colleagues, innovative technologies and a lot of fun at work
- Excellent individual development and training opportunities, Brown-bags, Meetups
- Room for ideas and the opportunity to shape solutions

You are willing to learn and grow with us? Then we are looking forward to getting to know you. Send us your application!
